

Company Profile — Foshan Shunde Youqing Paint Building Materials Co., Ltd.

Edition: v1.0 | **Date:** 2026-10-07 | **For:** Distributors, contractors and OEM buyers in Southeast Asia, the Middle East and Central Asia

Editorial rule for this document: every statement below is verifiable. Where a certificate does not exist, we say so. This profile deliberately contains no claim we cannot show you a document for.

1. Who We Are

Foshan Shunde Youqing Paint Building Materials Co., Ltd. is a water-based architectural coatings company based in the Shunde coatings industrial cluster, Foshan, Guangdong — approximately 60 km from Nansha Port.

Item	Detail
Legal name	Foshan Shunde Youqing Paint Building Materials Co., Ltd.
Formerly known as	Guangdong Shunde Youqing Paint Building Materials Co., Ltd. (renamed in October 2024)
Established	2013
Coatings manufacturing added to business scope	October 2024
Registered address	Magang Industrial Zone, Ronggui, Shunde, Foshan, Guangdong, China
Port distance	Nansha Port ~60 km · Yantian Port ~100–120 km
Tax credit rating	A-level (2025)

How to read this profile: we were founded in 2013 and added coatings manufacturing to our licensed scope in 2024. We do not claim a longer history than that. What we do have is long: 12 years of coatings know-how in one of China's three major paint manufacturing bases, and a production model built for the way distributors actually order.

2. Our Production Model

We combine **in-house production** with a **pre-qualified network of Shunde OEM partners**. This is a deliberate structure, not a compromise. A single production line cannot economically take a mixed container of five products in 500 kg quantities; a large manufacturer will not take it at all. Working across the Shunde cluster lets us accept those orders while still scaling to full-container volumes of a single grade.

We do ourselves	We do with pre-qualified partners
Formulation and batch recipe control	Large-volume base production
Colour matching and colour management	Additional capacity during peak season
Batch testing and release	Overflow filling and packing
Customer specification review	—

You will always be told which is which. We do not present a partner's output as our own factory output.

3. Quality Systems and Registered IP

Ten registered software copyrights cover our dosing, colour and batch-evaluation systems (all registered 2019-08-29):

Registered system	Function
友情油漆生产投料自动化控制系统	Automated dosing control
友情油漆生产色差自动化调和控制系统	Automated colour deviation blending control
友情漆建材生产性能综合评测系统	Comprehensive production performance evaluation
友情漆建材一体化产销库存管理系统	Integrated production–sales–inventory management
友情油漆生产工艺流程智能控制系统	Smart production process flow control
友情漆建材数字化供应商管理系统	Digital supplier management
友情漆建材行业销售商城管理系统	Sales and commerce management
友情油漆生产自动化灌装工艺控制系统	Automated filling process control
友情漆建材 ERP 生产加工执行系统	ERP production execution
友情油漆生产混合配方核定管理系统	Formula blending verification management

What this means commercially: the person mixing your batch is not guessing. The recipe is fixed, the tolerance is defined, the result is recorded, and we keep a retained sample from every batch so any claim can be checked against the actual production rather than argued about.

4. Product Range

Five lines covering the complete wall system. Wood coatings (PU/NC) are supplied **only as OEM support** for furniture manufacturers.

Line	Role	FOB reference (USD/kg)
Water-based interior emulsion	Volume driver — ~45% of export value	1.85–2.05

Line	Role	FOB reference (USD/kg)
Exterior stone-like / granite paint	Profit driver — ~25%	2.40–3.99
Waterproofing (JS / acrylic / K11)	Add-on line — ~15%	0.60–1.60
Artistic finish (travertine, microcement, eggshell)	Premium showcase — ~10%	2.40–3.99
Wood coating (PU/NC) — OEM only	Support line, hazardous goods class	2.10–3.20

These are reference ranges, not a price list. Final pricing depends on grade, colour, packaging and volume. Technical parameters are quoted per grade from the technical data sheet, never from a general page.

Grading: interior emulsion is available in economy, standard and premium grades. We recommend the grade by substrate, budget and expected use rather than listing numbers — tell us the project and we will specify.

5. Certification and Compliance

We publish only what we can show you a certificate for.

Certificate	Status
CCC — China Compulsory Product Certification	Held. No. 2025122104123145, issued 2025-04-02, valid until 2029-11-06. Currently the only third-party certificate we can present.
China Environmental Labeling (十环)	Under application — available upon request. Not claimed as granted.
French A+	Under application — available upon request. Not claimed as granted.
ISO 9001 / ISO 14001	Under application — available upon request. Not claimed as granted.

We will not claim a certificate we do not hold, and we will not let a certificate lapse silently — if an approval is withdrawn, the website and this profile are updated.

Shipping classification

We do not publish a blanket dangerous-goods classification, because it is confirmed case by case for each shipment.

- **PU/NC wood coatings are UN1263** and require dangerous-goods packaging and a dedicated freight quotation. We never declare wood coatings as general cargo. - **Water-based wall coatings** are handled according to the safety data sheet of the exact grade ordered, and the classification is stated to you in writing before shipment.

Target-market requirements

Requirements are handled per destination rather than claimed globally — for example, Vietnam's QCVN technical requirements for this product group. Tell us the exact product and destination

and we will state which requirement applies, what we can supply, and where the buyer must obtain local confirmation.

6. Trial Orders and Flexible Supply

The most common first order is a sample plus one mixed container — not a full programme.

Item	Terms
Trial order, standard grades	from 500 kg per reference
Trial order, premium grades	from 1,000 kg per reference
Mixed-SKU containers	welcome
Private label / OEM MOQ	one 20GP container
Sample dispatch	arranged once colour and specification are confirmed; date confirmed in writing
Sample size	250 g – 1 kg tins, with colour card and application guide
Courier cost	buyer's account, or credited against the first order
Production lead time	typically 7–15 days after deposit and final colour approval

Payment terms: 100% T/T in advance, or 30% deposit with the balance against a copy of the bill of lading. Open-account terms are not available at this stage.

Packing: 18L / 20L plastic pails, 5L retail packs, 200L iron drums, private-label printing. A 20GP of water-based pails is weight-limited at roughly 800–820 pails (21–22 tonnes), not volume-limited.

Incoterms: FOB Nansha as standard; CFR or CIF on request.

7. Logistics

Route	Typical sea transit from Nansha
Vietnam, Cambodia	3–8 days
Jebel Ali (Dubai)	12–18 days

Port congestion, customs clearance and seasonal weather add days. We build the schedule backwards from your required arrival date, not forwards from the shipment date.

Documents: commercial invoice, packing list and bill of lading as standard; certificate of origin can be arranged. If your country requires a specific certificate, tell us early — some markets require documents we cannot issue, and it is far better to know before production than after.

Duties and import taxes are on the buyer's account under FOB or CIF terms. We can suggest an HS code and we declare the true value. We do not under-invoice and we will not suggest anything that would make your customs clearance dishonest.

8. Quality Assurance and After-Sales

- Retained sample from every batch, available for claim verification - Third-party inspection, pre-shipment inspection and video audits welcome — book through your agent or ours, and we prepare batch records and packing lists in advance - In-house batch testing; batch released only when it falls within the agreed tolerance - Colour matched against a sealed standard sample, with the retained sample shipped so your laboratory can verify it too - Application data sheets, colour cards and short application videos included with the goods at no extra charge - On-site application demonstration with the partner factory available for first orders - Our preference on a claim is to replace or top up what did not perform rather than argue about freight costs

9. Current Export Position — stated honestly

We are building export channels in **Southeast Asia (Vietnam, Cambodia, the Philippines)**, the **Middle East (UAE as a transit hub, then Saudi Arabia)** and **Central Asia**.

We are a newer exporter in these markets than some suppliers you may speak with, and we will tell you exactly what our experience level is in yours — including where we are new. We would rather you know that before ordering than discover it after the container arrives.

Target markets in the short term, with the communication channel that actually works in each:

Market	Main channel
Vietnam	Zalo
Cambodia	Telegram
Saudi Arabia / UAE	WhatsApp
Russia	Telegram
Chinese-funded projects	WeChat

10. Compliance With This Document

This profile is a summary prepared for buyers. It is not a substitute for:

- the technical data sheet and safety data sheet of the specific grade you order - the applicable third-party test report - the certificate of origin or any certificate your country requires - written confirmation of shipping classification for your specific order

Contact us and we will send all of them before you commit to anything.

Quick facts

Established	2013 · coatings manufacturing scope added 2024
Base	Shunde coatings cluster, Foshan, Guangdong, China

To Nansha Port	~60 km
Product lines	5 (interior emulsion, exterior stone, waterproofing, artistic, wood OEM)
Registered software copyrights	10
Third-party certification held	CCC No. 2025122104123145 (valid to 2029-11-06)
Trial order	from 500 kg per reference
Payment	100% T/T in advance, or 30/70 against B/L copy
Container load	800–820 pails per 20GP (21–22 tonnes, weight-limited)
Default Incoterm	FOB Nansha

*Prepared July 2026 edition for Southeast Asian, Middle Eastern and Central Asian buyers.
